Lab_01: Introduction to Web Engineering.

Objective:

- Discuss about different Web Servers.
- Perform all the tasks.
- Create a CV page.

Task 1:

A web server is software (sometime hardware) that:

- Receive requests from clients (usually browsers).
- Process the request using the protocols.
- Send back the response in form of requested resource file.

Web Servers:

Apache: A cross platform (Win, Linux, Mac), best for beginners, share hosting. It provides a bit slower experience.

IIS (Internet Information Service): A Web server by Microsoft. Best for the ASP.NET, C#. Work only for Windows.

LiteSpeed: A Linux base server provides much higher speed than Apache for the Linux based system.

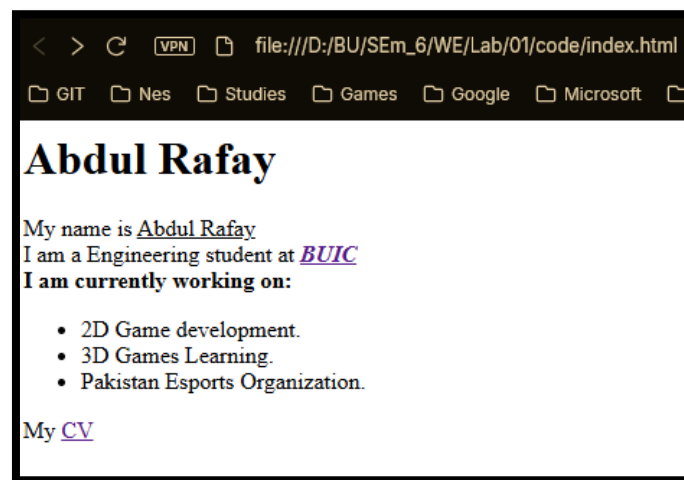

Caddy: A cross-platform web server provides high speed. It is simple and secure.

Task 2:

Code:

```
<html>
<head>
<title>Web Lab</title>
</head>
<body>
<h1>Abdul Rafay</h1>
<p>My name is <u>Abdul Rafay</u><br>
I am a Engineering student at <a
href="https://bahria.edu.pk"><i><b>BUIC</b></i></a><br>
<b>I am currently working on:</b>
<ul>
<li>2D Game development.
<li>3D Games Learning.
<li>Pakistan Esports Organization.
</li>
</ul>
My <a href="CV.html">CV</a>
</p>
</body>
</html>
```

Screen Shots:

Task 3:

Code:

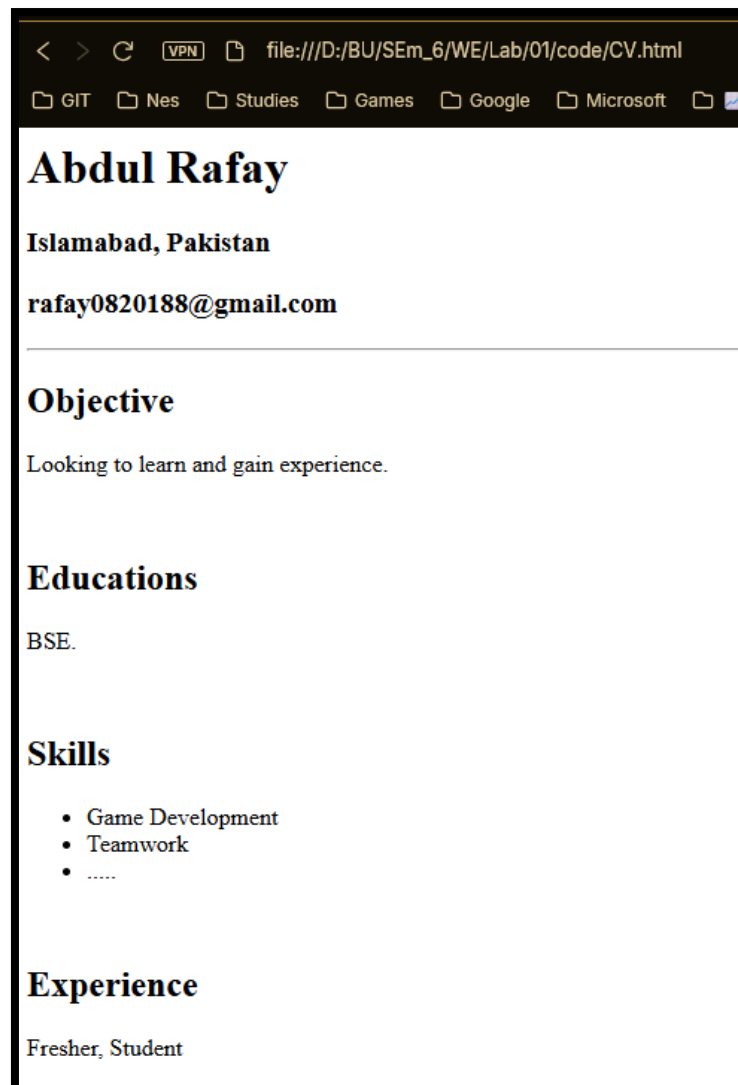

```
<html>
<head>
<title>Abdul Rafay</title>
</head>

<body>
  <p><h1>Abdul Rafay</h1><p>
  <p><h3>Islamabad, Pakistan</h3><p>
  <p><h3>rafay0820188@gmail.com</h3></p>
  <hr>

  <p><h2>Objective</h2>
  Looking to learn and gain experience.</p>
  <br>
  <p><h2>Educations</h2>
  BSE.</p>
  <br>
  <p><h2>Skills</h2>
  <ul>
    <li>Game Development
    <li>Teamwork
    <li>.....
  </ul></p>
  <br>
  <p><h2>Experience</h2>
  Fresher, Student</p>
  <br>
  <p><h2>Projects</h2>
  have done the projects includes:
  <ul>
    <li>Blockchain
```

```
<li>Console Game Dev
<li>Basic Antivirus Software
<li>Cyber Security (currently working on that)
</ul></p>
<br>
<p><h2>Github</h2>
<a href="https://github.com/CharlieFour">CharlieFour</a></p>

</body>
</html>
```

Conclusion:

At the end of this lab I learn about the Web Servers, able to understand and write html web page code.
